Stanford University
Stanford, California 94305

Dear Josh:

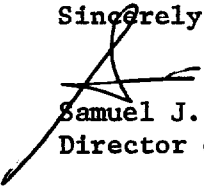

In reply to your note and the accompanying
* proposal, I have so very much to read, I must confess I
could not go over your material carefully enough to make
any definitive suggestions at this time.

You know the programs of The National
Foundation, and you know our interests. We will always
welcome the opportunity to evaluate an application from
you. I am therefore enclosing an application form and
a copy of our overall Policies Governing Research Grants.
The completed application is due by July 15, 1973, the
absolute deadline, with no extensions of time allowed.
The Certification of Approval of Human Subjects in Clinical
Research, VI, page 6, of the application must be properly
filled out and appropriately signed.

Josh, do not confuse this program focusing
on clinical research involving only humans with out other
research programs.

Miss not having seen you for years.
Best regards,

Sincerely yours,

Samuel J. Ajl, Ph.D.
Director of Research

Genetics Center I

THE MARCH OF DIMES

APR 27 1973

*I think we can use our June 1 version
of the Green Center proposal with minor editing
I have detailed forms. J.L.*

*How. Can
Note: I will be away
June 15 - July 15
so we should message this
right after June 1.*
